13. For these reasons

2. Possible answers:

Parag. 1: Technology has made big advances, but machine translation is still in its early stages

Parag.2: Words often have many meanings and translating machines cannot know all the meanings.

Parag. 3: It is important to consider the situation. Machines cannot do this- a human element is needed.

Parag. 4: Each language has its own way of expressing an idea and this cannot be translated exactly.

Parag. 5: Machines will not be able to translate successfully until they are able to think.
